Reference is made to the following document:

D1: TAZOE M ET AL: JOURNAL OF BIOLOGICAL CHEMISTRY, vol. 275, no. 15, 14 April 2000 (2000-04-14), pages 11300-11305

Novelty (Art 33(2) PCT)

The subject matter of claims 1-16 is new because the prior art does not disclose a recombinant Sinorhizobium transformed with pyridoxol 5'-phosphate synthase and D-erythrose 4-phosphate dehydrogenase.

Inventive step (Art 33(3) PCT)

The subject matter of claims 1-16 involves an inventive step because, although it is known that D-erythrose 4-phosphate dehydrogenase is missing from Sinorhizobium meliloti (D1), it does not prevent S. meliloti from producing vitamin B6 since an alternative pathway is in place. Therefore, there is no incentive for transforming Sinorhizobium with D-erythrose 4-phosphate dehydrogenase.
